Plan Overview

Plan Name	Apple Plus PPO - Aetna
Overview	When you use network providers, preventive care is covered 100%. You pay a copay if you use a Telehealth Network provider or a network provider for an in-person office visit or video consult. You may receive care from any provider, however, most benefits from an out-of-network provider are only payable at 70% of Eligible Expenses. Utilizing network providers will ensure a lower out of pocket cost and save you money. To ensure treatment meets clinical guidelines for coverage, you may want to obtain Pre-certification for complex health services, such as for any surgery, hospitalization, specialty drugs, clinical trials, etc. All of the coverage percentages noted below are based on the definition of Eligible Expenses. Eligible Expenses for network providers are based on negotiated rates, while out-of-network providers are based on various data resources. Important: If you're a US employee paid from Apple's or its designated affiliates' W-2 payroll and are represented by a union or covered by a collective bargaining agreement or other labor union agreement, the information on this document may not apply to you or may be covered by the terms of those agreements. Contact your union representative for any questions. Aetna Provider Directory

The Medical Plan(s) Chart highlights commonly used services and generally indicates how you and a medical plan will cover medical expenses you and/or your enrolled dependents incur. Benefits are provided for covered services that are medically necessary unless otherwise indicated. Some services are subject to annual or lifetime limits. The chart does not reflect all covered services, plan exclusions, limitations, or restrictions. It is not a contract or a guarantee of coverage.

See the [Apple Benefits Book](#) for more information.
